

PHP and Array: duplicate value

Contributed by Administrator
venerdì, 05 febbraio 2010

Here below a simple example to avoid duplicate value in a PHP Array using the array_unique PHP function.

```
$values = array(1,2,4,5,2,3,3,6);  
$uniq_values = array_unique($values);  
  
print_r($uniq_values);
```
