Pianeta Amiga 2008 edition will be held next 27th and 28th September at Palaesposizioni in Empoli: an event became famous during the years in the world of alternative platforms thanks also to important Italian and European exhibitors and visitors.

This event is not only an important occasion to meet people around the Amiga world but also an occasion for new projects and products coming from the informatics alternative world.

In this 2008 edition you will see a demonstration of AmigaOS 4.1 operating system.

A presentation of Sam400ep 1.5 is also scheduled. With its PowerPC 440 this is a new standard Flex ATX motherboard completely ideated and assembled in Italy.

Technical conferences and seminars for developers and programmes will take place during the two days as well as presentation of new hardware and software products.

27th and 28th September 2008 at Empoli's Palaesposizioni building: you'll be able to see all the latest about Amiga.
